*****. This book had its nucleus in some lectures given by one of
us (J. O M. B.) in a course on electrochemistry to students of
energy conversion at the University of Pennsyl- nia. It was there
that he met a number of people trained in chemistry, physics,
biology, metallurgy, and materials science, all of whom wanted
to know something about electrochemistry. The concept of
writing a book about electrochemistry which could be
understood by people with very varied backgrounds was thereby
engendered. The lectures were recorded and written up by Dr.
Klaus Muller as a 293-page manuscript. At a later stage, A. K. N.
R. joined the effort; it was decided to make a fresh start and to
write a much more comprehensive text. Of methods for direct
energy conversion, the electrochemical one is the most
advanced and seems the most likely to become of considerable
practical importance. Thus, conversion to electrochemically
powered transportation systems appears to be an important
step by means of which the difficulties of air pollution and the...
